WHO WINS *THE WORLD CUP?*

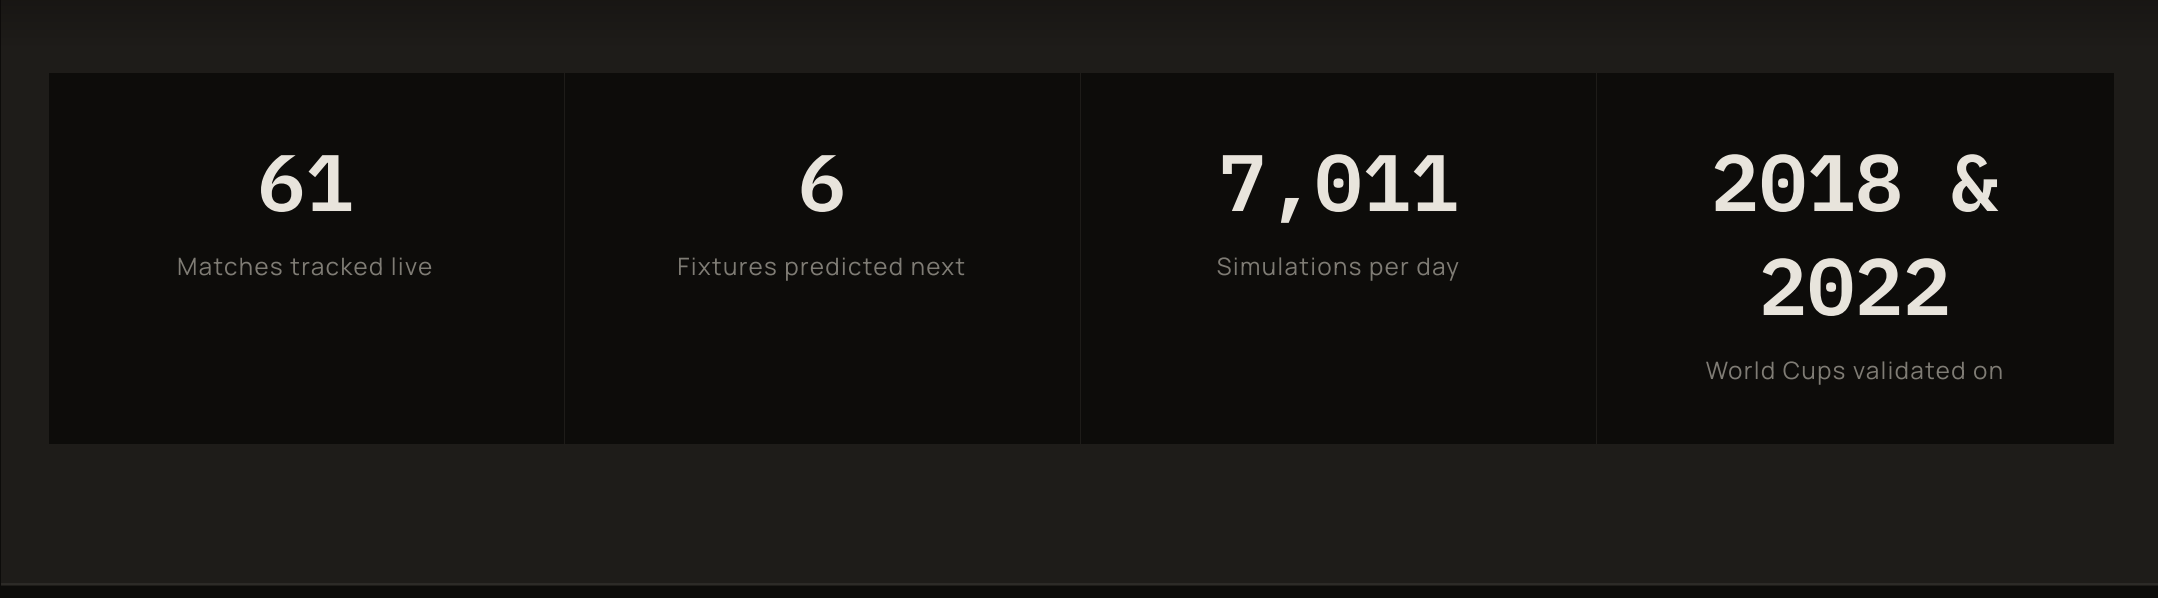

An ensemble model used by Opta Supercomputer rates every team, scores every match, then plays out the rest of the tournament 10,000 times a day.

TESTED ON REAL HISTORY

Before trusting it with 2026, we replayed 2018 and 2022 from the group stage onward. The eventual champion's odds climbed round after round in both, beating a simple world-ranking guess on average.
